my work

WORK EXPERIENCE

Kelda kelda.io Berkeley, CA
Software Engineer 2020 *Software Engineering Intern* Spring 2019
Built Blimp, a distributed tool for development in the cloud. **Designed** this distributed architecture within a tiny startup team. **Interacted** with the Kubernetes and Docker APIs directly.

Brave Software brave.com San Francisco, CA
Software Engineering Intern Summer 2019 – Fall 2019
Improved inter-process communication between components in the browser C++ core. **Built** React UI components for the Rewards system and local cryptocurrency wallet. **Merged** dozens of pull requests that are public on GitHub.

Studio by Purdue West Lafayette, IN
Student Developer Intern Summer 2016, Summer 2018
Deployed a new app to tens of thousands of students using ASP.NET and Azure in a small agile-based team. **Streamlined** data flow in the React frontend using Redux. **Abstracted and restructured** Android request handling.

Department of Computer Science, Purdue University West Lafayette, IN
Teaching Assistant, CS 252 (Systems Programming) Summer 2018
Mentored students with assignments and course material. **Created and updated** programming lab handouts and C skeleton code.

Angie's List angieslist.com Indianapolis, IN
Software Engineering Intern Summer 2017
Reimplemented a price comparison tool using the new React/Redux stack. **Restructured** microservice request handling within the company Scala backend library. **Created** integration tests and endpoint coverage reporting.

OTHER EXPERIENCE

Open Computing Facility ocf.io University of California, Berkeley
Site Manager Spring 2020
General Manager Summer 2019 – Fall 2019
Technical Manager Fall 2018 – Spring 2020
Led ~100 volunteer staff and 8 paid staff, utilizing \$90k+ yearly funding. **Leveraged** industry-standard tools such as LDAP/Kerberos, Kubernetes, and Puppet config management. **Maintained** an array of servers providing high performance computing, software mirrors, webhosting with 800k+ daily hits, and other services to 6000+ active users and 1000+ student organizations. **Managed** a lab of 30 Debian Linux workstations with thousands of weekly users.

PERSONAL PROJECTS

kotct/dot co5.us/dot
MinneHack at University of Minnesota January 2017
A tool for creating universally-available personal configurations, supporting GNU Emacs. Any dot user can seamlessly fetch and enable any other user's configuration, with just a few keystrokes. *In ongoing development.*
